18<sup>th</sup> Conference of the Research Network  
Macroeconomics and Macroeconomic Policies (FMM)

**30 October – 1 November 2014, Berlin**

with introductory lectures on heterodox economics  
for graduate students on 30 October 2013

Since 1996 the Research Network Macroeconomics and Macroeconomic Policies (FMM) has existed as a platform for analysis, research and discussion of macroeconomic issues. It is primarily based in Germany and Austria but cooperates closely with similar networks in other countries, particularly in Europe. The Network aims to be both a platform for discussions about economic theory as well as a forum for economic policy debates: Macroeconomic theory is seen as the basis for policies which aim at high employment, environmentally sustainable growth, price stability, reduced inequality, and the elimination of poverty. In particular, the Network seeks to promote an exchange between competing theoretical paradigms.
